Full Stack Software Engineer - Remote

Hiring Manager
Cardinal Financial

Dear Hiring Manager,

I am writing to apply for the position of Full Stack Software Engineer at Cardinal Financial advertised on indeed.com. I am a software engineer with a passion for developing efficient, cost-effective applications and a desire to learn new programming languages, platforms, and frameworks. I am motivated self-starter, a hardworking and driven person easily adaptable to different programming environments. I consider myself as an excellent team player who would work with the team by communicating effectively and is always ready for taking on new challenges. I believe very strongly in personal accountability and integrity and have always made sure to represent both my employer and myself in a professional and ethical way.

I have a Bachelor's and Master's degree in Computer science. Currently I am working as a Programmer Analyst at Vermont Information Technology Leaders. At my current job I am working on design and development of Web application, Rest APIs for VITL, analyze Healthcare data, design and development of interface for exchange and share of healthcare data between healthcare organizations across Vermont.

I have worked as a Software Engineer at NTT Data Inc. for 2+ years. During my tenure at NTT Data Inc., I have often worked on developing innovative and timely software solutions for multimillion-dollar and globally deployed software systems. I have worked on the complete life cycle development of next-generation software, from initial requirement gathering to design, coding, testing, documentation, and implementation. I have worked on developing Android apps with Udacity. I have recently completed a Mobile Web Specialist Course by Google and Udacity.

This specific job opportunity is a perfect match with my skill set. Especially, I have substantial experience working with Java, SQL Server, CSS, HTML, Javascript, jquery. REST APIs, SOAP Web services. I am also fluent in javascript frameworks like Angular, React. I am proficient in different databases like Oracle, My SQL, SQLite, DB2 and have advanced knowledge of developer applications, tools, methodologies and best practices. I have worked on a variety of software platforms and frameworks like Spring and Struts 2.0, .NET., Android. In addition, I frequently challenge myself into learning new languages and skills to keep myself updated with new technologies.

In addition to my full-time employment, I have also volunteered and donated my time to the community. More specifically, at the Motor Control Lab in the University of Montana, I acquainted myself with the hardware and software environments and successfully implemented data acquisition software. I have also designed the User Interface for human motor control research studies. In addition, I have volunteered at Jeanette Rankin Peace Centre, a non-profit organization in Missoula (MT), where I worked on developing the library database for the community.

I have included my resume for your review and look forward to an opportunity to meet with you to discuss how my skills and experience can benefit the Cardinal Financial team. I am a US permanent resident with eligibility to work for any employer in the US. Please feel free to contact me by email or phone. Thank you for your time and consideration.

Sincerely,
Shashvati Dash
